BrandArmor Technologies, LLC announces an exclusive national distribution deal with TST/Impreso

BrandArmor Technologies, LLC, manufacturers of the revolutionary BrandArmor+ polymer antimicrobial surface protection film announces an exclusive national distribution deal with TST/Impreso [1].

What makes BrandArmor+ polymer antimicrobial film groundbreaking is the fact that it is manufactured with safe antimicrobials, which can inhibit the growth of 99.99% of microbes, bacteria and viruses on surfaces. BranArmor+ is the only matte finish polymer film designed for wallcoverings and other high touch surfaces in order to make them permanently antimicrobial. The protective laminated films can be offered to a variety of clients, including healthcare, food service, hospitality, educational, retail, and other public-facing outlets.

"SafeWalls is truly a game changer as it's the only product available that is polymer based, antimicrobial and stainproof," says BrandArmor Senior Vice President, Jonathan Baltic. "With TST/Impreso serving as our exclusive wholesale distributor of BrandArmor+ polymer film to the wide format print industry the availability for your business is greatly enhanced.
