

## Elite Poly No-Tear Polypropylene

This 8 mil polypropylene has a specially formulated coating on the backside to force the media to lay flat on both sides. Tear Resistance and smooth matte, microporous top coating gives it the ability to reproduce rich, accurate color. This is an ideal product for indoor signage and has been designed for dye, pigmented and latex inks.

### Benefits:

- \* Water Resistant
- \* Non-Glare Matte Finish
- \* Tear Resistance
- \* Economical

### Applications:

- \* POP Display
- \* Indoor Banner
- \* Posters
