Our latest generation of instant dry photo papers! The new "Professional" lineup features a new, aggressively priced photo paper with all of the same benefits you have come to expect from our media. Available in gloss finish. Instant dry times with either Dye or UV inks.

LAMINATION

Can be over laminated with most cold and low-temperature hot laminates. Better adhesion is achieved using cold laminate. Overlap the image with .25 in. safe edge to prevent moisture absorption and premature paper splitting. Lamination can be performed immediately after printing as long as the inks are dry to the touch and do not smear.

MOUNTING

Recommended mounting material is cold, pressure-sensitive adhesive to provide the best bond.

LIFE EXPECTANCY

Indoor: 6 Months Outdoor: 3 Months
